

AI Interview Report

Detailed Candidate Evaluation Summary

Candidate: Zabee Ullah

Email: zabee9900@gmail.com

Target Role: Node Developer

Proctor Status: PASSED (0 tab switches)

OVERALL SCORE

3.6 / 10

Executive Summary & Feedback

****Final Interview Feedback Report****

****Candidate Name:** Zabee Ullah**

****Position:** Node Developer**

**1. Core Strengths**

- ****Communication:**** The candidate attempted to answer the first question, demonstrating a willingness to engage in the interview process. While the response lacked clarity, it indicates a basic level of verbal communication skills.

**2. Areas for Development**

1. **Technical Expertise:**

- The candidate demonstrated limited technical knowledge of the role's core requirements, such as integrating LangGraph, OpenAI APIs, or optimizing Node.js applications.

- Answers lacked depth, structure, and technical precision, with no evidence of hands-on experience in the required areas.

2. **Problem-Solving and Real-World Application:**

- The candidate failed to provide practical examples or demonstrate an ability to solve real-world technical problems.

- Questions requiring specific scenarios or best practices, such as structuring scalable applications or handling authentication and rate limiting, were either unanswered or inadequately addressed.

3. **Preparation and Confidence:**

- The candidate was unable to answer multiple questions, indicating a lack of preparation or relevant experience.

- Responses were brief, unclear, and lacked confidence, leaving the impression that the candidate is not

well-versed in the tools and technologies critical to the role.

4. **Attention to Detail:**

- Mispronunciation and incorrect terminology (e.g., "land graph" instead of "LangGraph") suggest a lack of familiarity with the subject matter.
- Precision and attention to technical details are essential for a Node Developer role, and this was noticeably absent.

3. Overall Hiring Recommendation

Recommendation: Not Recommended for Hire

Rationale: Zabee Ullah does not meet the technical or experiential requirements for the Node Developer role. Their inability to answer key technical questions, lack of demonstrated expertise in core backend technologies, and insufficient preparation indicate that they are not currently a fit for the position. While the candidate showed some level of interest, the role requires a much deeper understanding of Node.js, Express, and third-party API integrations like LangGraph and OpenAI, as well as the ability to provide clear, real-world examples of their work.

Suggestions for Improvement:

- Gain hands-on experience in Node.js and related backend frameworks like Express.
- Develop a deeper understanding of integrating third-party APIs, including LangGraph and OpenAI, with a focus on authentication, rate limiting, and scalability.
- Practice explaining technical concepts clearly and concisely, with detailed examples from real-world projects.
- Prepare thoroughly for interviews by reviewing role-specific requirements and practicing answering technical questions.

Final Note: While Zabee Ullah is not currently suited for this position, with additional training and hands-on experience, they may be better positioned to apply for similar roles in the future.

Detailed Question Breakdown

Question 1

R: 3/10 | Cl: 2/10 | Co: 1/10

"Can you describe your experience integrating LangGraph into a Node.js application and explain how it interacts with other backend components like Express?"

Answer: yeah it is very easy question actually integrating the land graph in the note GS is very easy especially when there are three defined functions existing

Evaluator Feedback: The candidate failed to provide technical accuracy or depth regarding LangGraph integration with Node.js. There is no mention of specific steps, API usage, or interaction with Express or other backend components. The answer lacks clarity, uses incorrect terminology ('land graph' instead of 'LangGraph'), and completely misses key practical details. More elaboration and precision are needed to demonstrate relevant experience and understanding.

Question 2

R: 0/10 | Cl: 0/10 | Co: 0/10

"Can you walk me through a specific example of how you implemented LangGraph in a Node.js application, detailing the predefined functions you mentioned and how you integrated them with Express routes?"

Answer: No response recorded.

Evaluator Feedback: N/A

Question 3

R: 0/10 | Cl: 0/10 | Co: 0/10

"Given your experience with React Native and Expo, how would you optimize a full-stack mobile application that uses a Node.js backend for better performance?"

Answer: No response recorded.

Evaluator Feedback: N/A

Question 4

R: 1/10 | Cl: 1/10 | Co: 1/10

"How do you structure a Node.js and Express application to ensure scalability and maintainability, especially when integrating third-party APIs like LangGraph or OpenAI?"

Answer: I don't have a real answer of it sorry

Evaluator Feedback: The candidate provided no answer to the question. This demonstrates a lack of understanding or preparation for structuring scalable and maintainable Node.js and Express applications, particularly when integrating third-party APIs like LangGraph or OpenAI. Clear knowledge of best practices, modular design, and API integration strategies is expected for this role.

Question 5

R: 1/10 | Cl: 1/10 | Co: 1/10

"Can you provide a specific example of how you have integrated OpenAI APIs into a Node.js application and explain how you handled authentication and rate limiting?"

Answer: no I don't have any answer of it

Evaluator Feedback: The candidate did not provide any response to the question, leaving it entirely unanswered. This demonstrates a lack of relevant experience or preparation concerning integrating OpenAI APIs, handling authentication, or managing rate limiting in Node.js applications. A detailed example and explanation were expected.
